

Adding a Mobile Shortcut Android

Intro

The most consistent way to add a shortcut on an Android device is to download the *Bookmark Home** Android application from the Google Play Store. Once the application is downloaded add the Bookmark Home application to your Android Launcher homepage.

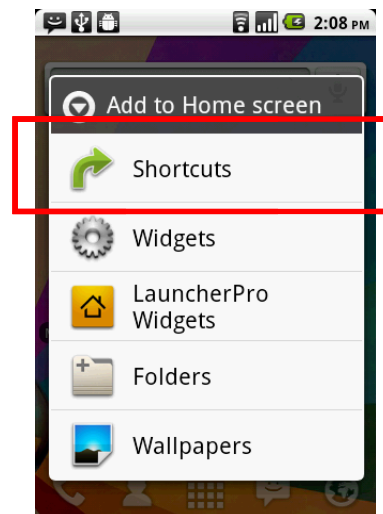

Each version of the Android operating system has slightly different procedures. Adding the Bookmark Home application to the launcher homepage for the following versions of Android is detailed below.

- Froyo
- Gingerbread
- Honeycomb
- Ice Cream Sandwich

Adding *Bookmark Home* Application to the launcher homepage

Froyo and Gingerbread

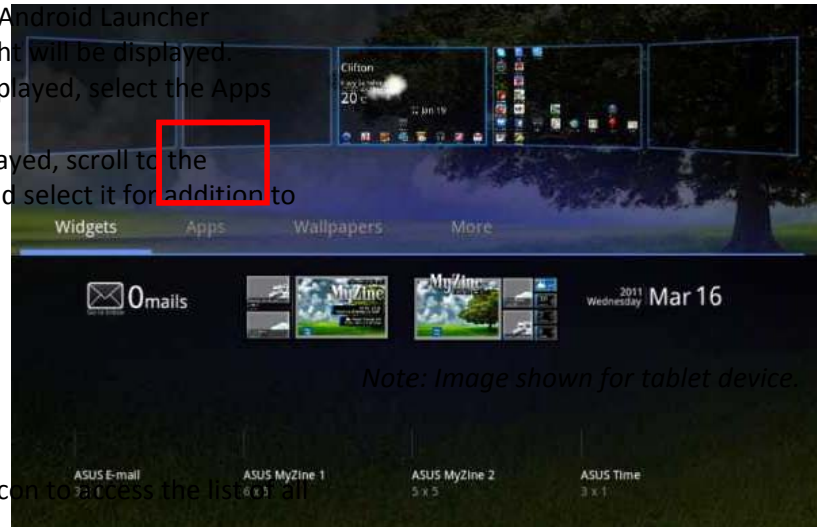

1. Long Press (> 1 second) on the Android Launcher homepage the menu pictured here will be displayed.
2. Choose the Shortcuts option
 - a. From here, simply select the Applications option
 - b. Choose the Bookmark Home from the list of applications

Adding a Mobile Shortcut Android

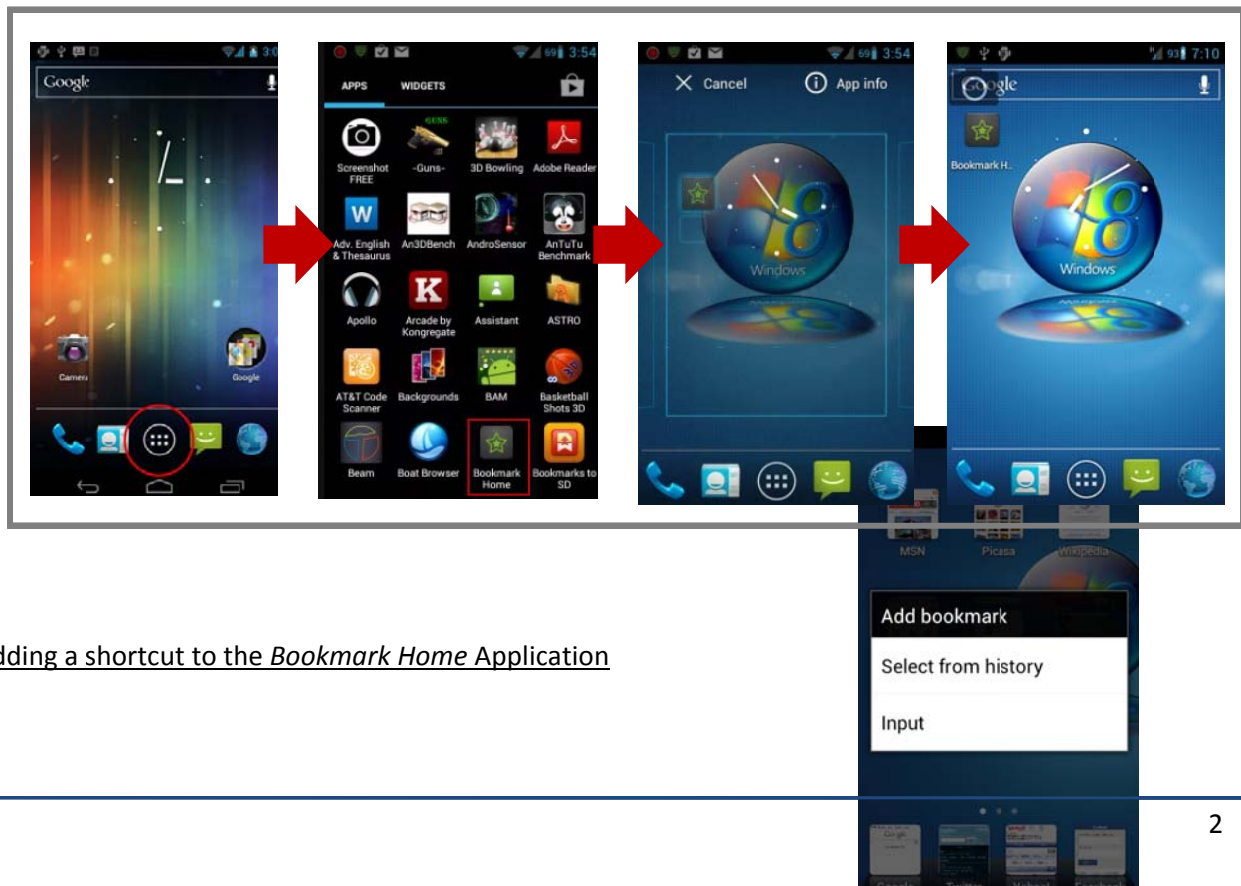

Honeycomb

1. Long Press (> 1 second) on the Android Launcher homepage and the menu at right will be displayed.
2. Once the Launcher Menu is displayed, select the Apps option.
3. Once the applications are displayed, scroll to the *Bookmark Home* application and select it for addition to the launcher homepage.

Ice Cream Sandwich

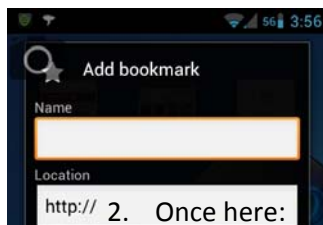

1. Select the Application Drawer icon to access the list of all applications.
2. Find the *Bookmark Home* Application and long press (> 1 second) the icon.
3. The launcher pages will be displayed and one can drag the application to one of the launcher pages for permanent placement.

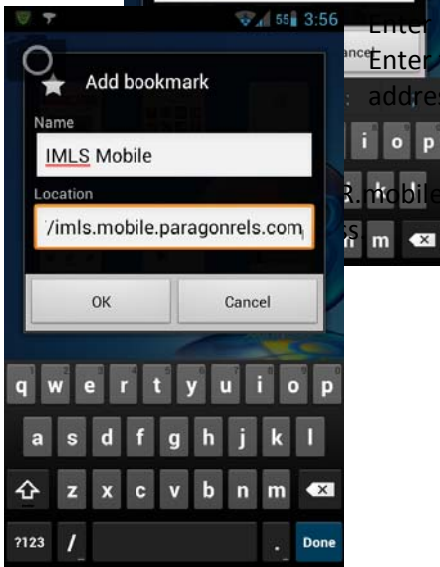

Adding a shortcut to the *Bookmark Home* Application

Adding a Mobile Shortcut Android

1. Start the Bookmark Home application and long press (> 1 second) an area on the application screen where no other icons exist. The menu for shortcut addition is displayed.
 - a. Select *Add Bookmark*
 - b. Choose the *Input* option

2. Once here:
 - a. Enter in the name you wish to use as the label for the shortcut
 - b. Enter the address you wish to access with the shortcut. Standard Paragon Mobile addresses have the following format:
CNAME.mobile.paragonrels.com
 - c. mobile.paragonrels.com would point to the Tuolumne County Association of Realtors

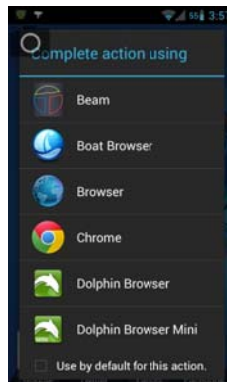

3. You have successfully created a shortcut! Once the bookmark is created within the *Bookmark Home*

Adding a Mobile Shortcut Android

Application, it can be accessed directly. When pressing the *Bookmark Home* icon for the shortcut to Mobile, the page will automatically be displayed in the browser.

Note: If you have more than one browser installed on the Android mobile device, you will be prompted to select which browser should be used:

*The *Bookmark Home* application has been tested with the following browsers in an Ice Cream Sandwich environment: Default Android Browser, Opera Mini, Opera Mobile, Dolphin Mini, Dolphin Browser, Android Chrome, Maxthon Browser, and Firefox.
