

Adding a Mobile Shortcut iOS

Intro

In order to create a shortcut on an iOS device, the user must navigate through the Safari browser.

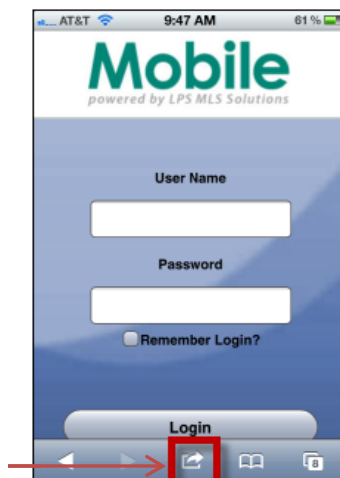

1. Open the Safari Browser by tapping the  icon
2. Enter the address you wish to access into the address bar. Standard Paragon Mobile addresses have the following format:

CNAME.mobile.paragonrels.com

Example: TCAR.mobile.paragonrels.com would point to the Tuolumne County Association of Realtors Mobile address.

	MLS
--	-----

3. Tap the *ARROW* button on the bottom of the browser page.

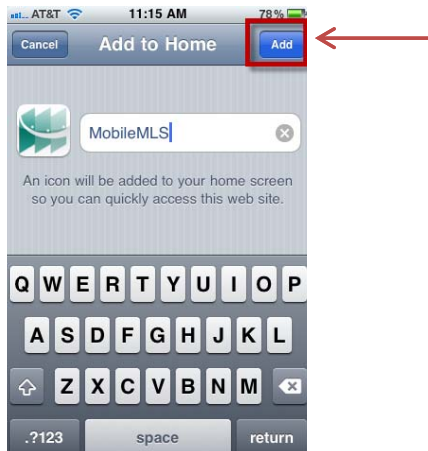

4. Tap the *Add to Home Screen* button

Adding a Mobile Shortcut iOS

5. Enter a name for the shortcut and tap *Add*

6. You have successfully created a home
